The advertisement features a photograph of the Model PS-100 cryogenic probe station, a complex piece of scientific equipment with various lenses, mirrors, and mechanical components. The background is a gradient of blue. The text is arranged around the image: 'Model PS-100' in large bold letters, 'Tabletop Cryogenic Probe Station' below it, the Lake Shore Cryotronics logo (a stylized blue square) and name to the right, and the slogan 'An affordable solution for a wide range of research' in a white italicized font at the bottom right.

Page 233113-1, column 2, para 3, line 1-3 of published article¹ should be read as “Figure 1 shows representative transmission electron microscope (TEM) images of lithium-doped ZnO quantum dots taken at magnification $150k\times$. Images of Na doped dots are essentially the same.”

We apologize that we did not obtain the necessary permission for reproducing the images in Figure 1 at the time of publication. We would like to take this opportunity to properly credit Figure 1 and correct the figure caption as follows: “Representative TEM images of Li-doped ZnO quantum dots grown for (a) 1 h and (b) 5 h taken at magnification $150k\times$. Reprinted Figs. 2B and 2D with permission from Yadav *et al.*, Phys. Rev. Lett. **97**(8), 085502 (2006). Copyright (2006) American Physical Society.”
